

UNDER PRESSURE!

HOW COMPRESSED AIR CAN BE USED TO POWER THE FUTURE!

SOLAR POWERED AIR COMPRESSOR COMPRESSES AIR AND PUSHES IT INTO UNDERGROUND TANKS.

HIGH PRESSURE AIR IS LIKE A BATTERY. THE ENERGY CAN BE RELEASED LATER TO DRIVE A TURBINE.

AIR PRESSURE SPINS A TURBINE WHICH DRIVES A GENERATOR TO MAKE ELECTRICITY

COMPRESSED AIR CAN ALSO BE USED FOR TRANSPORTATION.

MAKE YOUR OWN AIR POWERED MONO-RAIL!

TAPE A STRAW TO THE BALLOON AND THREAD A STRING THROUGH IT. THIS KEEPS US MOVING IN A STRAIGHT LINE. USE A CLOTHES PIN FOR A TRIGGER.
